TEAM PHOTO

We are Code & Shine, three students from Majadahonda, Madrid. Sofía is our programmer, who built the app in Thunkable and learned to debug real runtime bugs screen by screen. Sol is our data researcher, who cleaned 164 waste types and more than 38,000 collection points from Madrid’s open data portal. Sara is our storyteller, who surveyed 31 neighbours, wrote letters to our Mayor, and led the pilot with ten families. Like Ada Lovelace, we believe code truly matters when it helps the community

around us.
